SUBJECT INDEX FOR VOLUME 58, 1984

A

Acetate
And propionate production in the cecum and proximal colon of lambs, 203
Adenylate cyclase
Effect of prostaglandin $F_2\alpha$ on the, and phosphodiesterase activity of ovine corpora lutea, 955
Adipose tissue
Effect of sex on lipogenic activity in swine, 600
Effects of ovine growth hormone and other anterior pituitary hormones on lipolysis of rat and ovine, in vitro, 1191
Evidence that phosphofructokinase limits glucose utilization in bovine, 1198
Histochemical and cellular aspects of, development in decapitated pig fetuses: An ontogeny study, 1540
Age
Influence of breed, sex, and electrical stimulation on carcass and palatability traits of three bovine muscles, 1358
Luteinizing hormone secretion in ovariectomized gilts: Effects of, reproductive state and estrogen replacement, 165
Age at puberty
Effects of exercise during the growing-finishing period on performance, and conception rate of gilts, 541
Albumin
Sex ratio after insemination of bovine spermatozoa isolated using a bovine serum, gradient, 1432
Alfalfa
Effect of particle size and physical form of suncured, on digestibility for gravid swine, 378
Alfalfa, drum dehydrated
Nitrogen metabolism of steers fed suncured hay and, and Coastal Bermuda grass, 987
Alfalfa hays
Oxalic acid content of, and its influence on the availability of calcium, phosphorus and magnesium to ponies, 939
Alfalfa meal
Proximate composition and sensory characteristics of meat from rabbits fed three levels of, 62
Amino acid
Availabilities in soybean meal, sunflower meal, fish meal and meat and bone meal fed to growing pigs, 926
Evaluation of, B vitamins and butylated hydroxyanisole as protective agents against pyrrolizidine alkaloid toxicity in rats, 138
Isolation-perfusion of ovine hind limbs.
IV. Effects of level of activity on, and glucose metabolism, 1437
Released during protein degradation by rumen microbes, 436
Amino acid absorption
Protein degradation in the rumen and, in the small intestine of lactating dairy cattle fed various protein sources, 244
Anaerobic and coliform bacteria
Antibiotic resistance in, from the intestinal tract of swine fed therapeutic and subtherapeutic concentrations of chlortetracycline, 123
Angus
An evaluation of bias in estimated breeding values for weaning weight in, beef cattle field records.
I. Estimates of within herd genetic trend, 545
II. Estimates of bias due to genetic trend, 550
III. Estimates of bias due to nonrandom mating, 556
Performance of crosses among Hereford, and Simmental cattle with different levels of Simmental breeding.
I. Preweaning growth and survival, 1321
II. Effect of calf breed on cow productivity, 1329
Angus bulls, yearling
Estimates of heritabilities and of genetic and phenotypic correlations among growth and reproductive traits in, 887
Animal model
Comparison of an, and an equivalent reduced animal model for computational efficiency using mixed model methodology, 1090
Animal science
Feral animal studies in,: The uses and limitations of feral animal studies to contemporary animal science, 474
Animals
Biochemical studies on the fate of monensin in, and in the environment, 1528
Animals, laboratory
Comparative toxicology on monensin sodium in, 1512
Antibiotic feeding
Effect of space allowance and, on performance of nursery pigs, 801
Antibiotic resistance
In anaerobic and coliform bacteria from the intestinal tract of swine fed therapeutic and subtherapeutic concentrations of chlortetracycline, 123
Of fecal coliforms from swine fed subtherapeutic and therapeutic levels of chlortetracycline, 666
Arginine
Effects of excess, with and without supplemental lysine on performance, plasma amino acid concentrations and nitrogen balance of young swine, 369

B

B vitamins and butylated hydroxyanisole
Evaluation of amino acids, as protective agents against pyrrolizidine alkaloid toxicity in rats, 138
Backfat
Growth and carcass traits at 135 kg for progeny of swine selected for growth and, 275
The development of the inner layer of, in fetal and young pigs, 1550

Bacterial fermentation
The effect of diet on fecal moisture, osmolarity of fecal extracts, products of, and loss of minerals in feces of weaned pigs, 1403
Band ("heat-ring")
Factors affecting the formation of a dark, coarse, in bovine longissimus muscle, 1366
Barrow
The lysine requirement of the growing boar versus, 657
Beef
Effect of energy intake on the postpartum interval in, cows and the adequacy of the cow's milk production for calf growth, 1068
Beef bulls
Frame score and fat probe for predicting compositional characteristics of young, 787
Beef cattle
An evaluation of bias in estimated breeding values for weaning weight in Angus, field records.
I. Estimates of within herd genetic trend, 545
II. Estimates of bias due to genetic trend, 550
III. Estimates of bias due to nonrandom mating, 556
Effect of level of forage intake on rumen ammonia, pH, liquid volume and liquid dilution rate in, 708
Genetic correlations among sex-limited traits in, 1171
Grading and rotational crossbreeding of,
I. Reproductive performance, 25
II. Calf performance to weaning, 38
III. Postweaning and carcass traits of steers, 47
Postpartum nutrient intake and body condition: Effect on pituitary function and onset of estrus in, 265
Utilization of potato-corn biosolids single-cell protein and potato-corn primary waste by, 1292
Beef muscles
Effects of a grass or grain diet on the quality of three, 619
Beef production
Life cycle efficiency of,:
III. Components of postweaning efficiency and efficiency to the slaughter end point, 1107
IV. Cow efficiency ratios for progeny slaughtered, 1119
Mathematical modeling of alternative culling and crossbreeding strategies in, 6
Beef roasts
Effects of mechanical tenderization and cooking treatments upon product attributes of pre- and post-rigor, 626
Beef sire evaluation models
Comparison of, for an organized progeny test, 1313
Beef steers
Role of insulin and glucose on metabolite uptake by the hind half of, 1446
Behavior
And ecology of wild and feral swine (Sus scrofa), 482
Of feral horses and ponies, 493
Bioactivation
Hepatic metabolism and, of mycotoxins and plant toxins, 1017
Biological efficiency
A comparison of crossbred and straightbred cow-calf pairs.
II., Of the cow-calf unit, 1160
Blood composition
The effect of diet on performance, digestibility, and intestinal microflora of weaned pigs, 1396
Blood flow, uterine
During early pregnancy in ewes: Interaction between the conceptus and the ovary bearing the corpus luteum, 423
Boar
The lysine requirement of the growing, versus barrow, 657
Boars
Relationships among measures of testicular development and endocrine function in, 1255
Testicular development and endocrine characteristics of, selected for either high or low testis size, 675
Boars, prepubertal
Effect of castration on plasma luteinizing hormone concentrations in, 1271
Body and backfat composition
Relationship of lactation energy intake and occurrence of postweaning estrus to, in sows, 1236
Body composition
A system for predicting, and performance of growing cattle, 725
Estimating, in mice by near-infrared spectrophotometry, 1181
Genetic and physiological aspects of growth, and feed efficiency in mice: A review, 577
Bone meal
Amino acid availabilities in soybean meal, sunflower meal, fish meal and meat and, fed to growing pigs, 926
Bovine
Evidence that phosphofructokinase limits glucose utilization in, adipose tissue, 1198
Bovine longissimus muscle
Factors affecting the formation of a dark, coarse band ("heat-ring") in, 1366
Bovine muscles
Influence of breed, sex, age and electrical stimulation on carcass and palatability traits of three, 1358
Bovine serum
Sex ratio after insemination of bovine spermatozoa isolated using a, albumin gradient, 1432
Bovine spermatozoa
Sex ratio after insemination of, isolated using a bovine serum albumin gradient, 1432
Bowel function, lower
Essential fatty acid status and characteristics associated with colostrum-deprived gnotobiotic and conventional lambs. Growth, organ development, cell membrane integrity and factors associated with, 971
Breed
Effect of, and intake level on growth and feed efficiency in ram lambs, 560
Effects of, and castration on conformation, classification, tissue distribution, composition and quality of lamb carcasses, 1343
Influence of, sex, age and electrical stimulation on carcass and palatability traits of three bovine muscles, 1358

Lamb production and its components in pure breeds and composite lines.
II., Effects and heterosis, 301
Breed groups
Relationship of growth stimulants and, on carcass characteristics and palatability of young bulls, 920
Breeding
Performance of crosses among Hereford, Angus and Simmental cattle with different levels of Simmental,.
I. Preweaning growth and survival, 1321
II. Effect of calf breed on cow productivity, 1329
Seasonal changes in, activity, testicular size, testosterone concentration and seminal characteristics in rams with long or short breeding season, 416
Breeding season
Seasonal changes in breeding activity, testicular size, testosterone concentration and seminal characteristics in rams with long or short, 416
Breeding values
An evaluation of bias in estimated, for weaning weight in Angus beef cattle field records.
I. Estimates of within herd genetic trend, 545
II. Estimates of bias due to genetic trend, 550
III. Estimates of bias due to nonrandom mating, 556
Bull calves
Pituitary-testicular responses of estradiol-17β-implanted, to continuous versus pulsatile infusion of luteinizing hormone releasing hormone, 943
Bulls
Diurnal behavior patterns of feedlot, during winter and spring in northern latitudes, 1057
In vitro testosterone secretion by testicular tissue from young, and the effects of chronic and acute exposure to estradiol-17β, 949
Bulls, beef
Frame score and fat probe for predicting compositional characteristics of young, 787
Bulls, Holstein
Evaluation of two seminal collection regimens for mature, 1
Bulls, yearling Angus
Estimates of heritabilities and of genetic and phenotypic correlations among growth and reproductive traits in, 887
Bulls, young
Relationship of growth stimulants and breed groups on carcass characteristics and palatability of, 920

C

Calcium
Oxalic acid content of alfalfa hays and its influence on the availability of, phosphorus and magnesium to ponies, 939
Calf breed
Performance of crosses among Hereford, Angus and Simmental cattle with different levels of Simmental breeding.
II. Effect of, on cow productivity, 1329
Calf growth
Effect of energy intake on the postpartum interval in beef cows and the adequacy of the cow's milk production for, 1068
Calf performance
Grading and rotational crossbreeding of beef cattle.
II., to weaning, grading and rotational crossbreeding of beef cattle, 38
Calves
Effects of pretransit diets and post-transit potassium levels for feeder, 700
Calves, bull
Pituitary-testicular responses of estradiol-17β-implanted, to continuous versus pulsatile infusion of luteinizing hormone releasing hormone, 943
Campylobacter jejuni
The importance of, to the meat industry: A review, 1561
Carbadox
Responses of weanling pigs to dietary supplementation with vitamin C or, 132
Carbohydrate
Use of, and fat as energy source by obese and lean swine, 894
Carcass
Composition and mammary development responses to photoperiod and plane of nutrition in Holstein heifers, 913
Influence of breed, sex, age and electrical stimulation on, and palatability traits of three bovine muscles, 1358
Prediction of pork belly composition using various measurements of the, or belly, 611
Carcass characteristics
Relationship of growth stimulants and breed groups on, and palatability of young bulls, 920
Carcass composition
Effect of various dietary arginine:lysine ratios on performance, and plasma amino acid concentrations of growing-finishing swine, 362
Influence of protein intake, energy intake and stage of gestation on growth, reproductive performance, nitrogen balance and, in gestating gilts, 647
Carcass quality
Digestibility and feedlot performance of swine fed various levels of sunflower seed, 1205
Carcass traits
Grading and rotational crossbreeding of beef cattle.
III. Postweaning and, of steers, 47
Growth and, at 135 kg for progeny of swine selected for growth and backfat, 275
Reciprocal recurrent selection in swine:, 821
Carcasses, lamb
Effects of breed and castration on conformation, classification, tissue distribution, composition and quality of, 1343
Cassava meal
Evaluation of methionine supplementation to diets containing, for swine, 812
Castration
Effect of, on plasma luteinizing hormone concentrations in prepubertal boars, 1271
Effects of breed and, on conformation, classification, tissue distribution, composition and quality of lamb carcasses, 1343

Cattle
A system for predicting body composition and performance of growing, 725
Characterization of biological types of, (Cycle III) IV. Postweaning growth and feed efficiency, 312
Energy and protein utilization in growing, 766
Influence of monensin on the performance of, 1484
Monensin in,: Introduction, 1461
Monensin toxicity in, 1499
Nutritional effects on the distribution of live weight as gastrointestinal tract fill and tissue components in growing, 753
Oxidative and conjugative metabolism of xenobiotics by livers of, sheep, swine and rats, 386
Performance of crosses among Hereford, Angus and Simmental, with different levels of Simmental breeding.
I. Preweaning growth and survival, 1321
II. Effect of calf breed on cow productivity, 1329
Cattle, beef
Effect of level of forage intake on rumen ammonia, pH, liquid volume and liquid dilution rate in, 708
Genetic correlations among sex-limited traits in, 1171
Grading and rotational crossbreeding of,.
I. Reproductive performance, 25
II. Calf performance to weaning, 38
III. Postweaning and carcass traits of steers, 47
Utilization of potato-corn biosolids single-cell protein and potato-corn primary waste by, 1292
Cattle diets
Relation of feedlot performance and certain physiological responses to the metabolizable protein and urea content of, 1285
Cattle, lactating dairy
Protein degradation in the rumen and amino acid absorption in the small intestine of, fed various protein sources, 244
Cell membrane integrity
Essential fatty acid status and characteristics associated with colostrum-deprived gnotobiotic and conventional lambs. Growth, organ development, and factors associated with lower bowel function, 971
Cerebral hemispheres
Electrical activity in the, of electrically stunned pigs, 68
Characteristics
Performance, ruminal and serum, of steers fed lasalocid on pasture, 460
Chicks
Effect of chlortetracycline on the spread of R-100 plasmid-containing Escherichia coli Bel15R from experimentally infected pigs to uninfected pigs and, 519
Chloride, ytterbium
As a marker for particulate matter in the rumen, 465
Chlortetracycline
Antibiotic resistance in anaerobic and coliform bacteria from the intestinal tract of swine fed therapeutic and subtherapeutic concentrations of, 123
Antibiotic resistance of fecal coliforms from swine fed subtherapeutic and therapeutic levels of, 666
Effect of, on the spread of R-100 plasmid-containing Escherichia coli Bel15R from experimentally infected pigs to uninfected pigs and chicks, 519
Citric acid
Fumaric and, as feed additives in starter pig nutrition, 935
Classification
Effects of breed and castration on conformation, tissue distribution, composition and quality of lamb carcasses, 1343
Coliforms, fecal
Antibiotic resistance of, from swine fed subtherapeutic and therapeutic levels of chlortetracycline, 666
Colostrum-deprived
Essential fatty acid status and characteristics associated with, gnotobiotic and conventional lambs. Growth, organ development, cell membrane integrity and factors associated with lower bowel function, 971
Composition and quality of lamb carcasses
Effects of breed and castration on conformation, classification, tissue distribution, 1343
Composition and sensory characteristics
Proximate, of meat from rabbits fed three levels of alfalfa meal, 62
Compositional characteristics
Frame score and fat probe for predicting, of young beef bulls, 787
Conception
Synchronized estrus and subsequent, in dairy heifers treated with prostaglandin $F_2\alpha$.
I. Influence of stage of cycle at treatment, 805
Conception rate
Effects of exercise during the growing-finishing period on performance, age at puberty and, of gilts, 541
Conceptus
Uterine blood flow during early pregnancy in ewes: Interaction between the, and the ovary bearing the corpus lteum, 423
Confinement-managed gilts
Estrus, ovulation, conception and embryo survival in, of three weight groups, 281
Conformation
Effects of breed and castration on, classification, tissue distribution, composition and quality of lamb carcasses, 1343
Cooking treatments
Effects of mechanical tenderization and, upon product attributes of pre- and post-rigor beef roasts, 626
Copper
Interactive effects of dietary calcium, phosphorus and, on performance and liver stores of pigs, 356
Corn
Performance of growing-finishing swine fed high-moisture or artificially dried, in complete and free-choice diets, 1307
Corpus luteum
Uterine blood flow during early pregnancy in ewes: Interaction between the conceptus and the ovary

bearing the, 423
Correlations, genetic and phenotypic
Estimates of heritabilities and of, among growth and reproductive traits in yearling Angus bulls, 887
Cross, diallel
Postpartum performance in a, among lines of mice selected for litter size and body weight, 863
Reproductive performance in a, among lines of mice selected for litter size and body weight, 846
Crossbred
A comparison of, and straightbred cow-calf pairs.
I. Heterosis effects on total feed efficiency, 1151
II. Biological efficiency of the cow-calf unit, 1160
Crossbreeding strategies
Mathematical modeling of alternative culling and, in beef production, 6
Cow efficiency ratios
Life cycle efficiency of beef production:
IV., For progeny slaughtered, 1119
Cow productivity
Performance of crosses among Hereford, Angus and Simmental cattle with different levels of Simmental breeding.
II. Effect of calf breed on, 1329
Cow-calf pairs
A comparison of crossbred and straightbred,.
I. Heterosis effects on total feed efficiency, 1151
II. Biological efficiency of the cow-calf unit, 1160
Cows
Energy utilization by mature, nonpregnant, nonlactating, of different types, 234
Relationships among various body components of, 222
Testosterone effects on gonadotropin response to GnRH: And pony mares, 409
Cows, beef
Effect of energy intake on the postpartum interval in, and the adequacy of the cow's milk production for calf growth, 1068
Cows, Holstein
Effects of heat stress during pregnancy on postpartum reproductive changes in, 174
Cows, nonlactating
Energy utilization by mature, nonpregnant, of different types, 234
Culling
Mathematical modeling of alternative, and crossbreeding strategies in beef production, 6
Cultures
Effects of solids and liquid flows on fermentation in continuous,.
IV. pH and dilution rate, 692

D

Dacron bag technique
Evaluation of nitrogen solubility and the, as methods for estimating protein degradation in the rumen, 714
Dairy heifers
Synchronized estrus and subsequent conception in, treated with prostaglandin $F_2\alpha$.
I. Influence of stage of cycle at treatment, 805
Dairy steers
Summer fescue toxicity in, fed tall fescue seed, 1057
Diet
The effect of, on fecal moisture, osmolarity of fecal extracts, products of bacterial fermentation and loss of minerals in feces of weaned pigs, 1403
The effect of, on performance, digestibility, blood composition and intestinal microflora of weaned pigs, 1396
Diet protein
Influence of pretransit zeranol implant and receiving, and urea levels on performance of yearling steers, 527
Dietary arginine:lysine
Effect of various, ratios on performance, carcass composition and plasma amino acid concentrations of growing-finishing swine, 362
Dietary calcium
Interactive effects of, phosphorus and copper on performance and liver stores of pigs, 356
Dietary energy
Luteinizing hormone secretion after withdrawal of exogenous progestogen in heifers fed three levels of, 151
Dietary fiber digestibility
The influence of, on the nitrogen requirements of mature horses, 638
Dietary protein
Effect of, and energy levels on rumen fermentation in Holstein steers, 452
Dietary supplementation
Responses of weanling pigs to, with vitamin C or carbadox, 132
Diets
Effects of pretransit, and post-transit potassium levels for feeder calves, 700
Performance of growing-finishing swine fed high-moisture or artificially dried corn in complete and free-choice, 1307
Digesta turnover rate
Some factors influencing estimates of, using markers, 979
Digestibility
Carcass quality, and feedlot performance of swine fed various levels of sunflower seed, 1205
Effect of particle size and physical form of suncured alfalfa on, for gravid swine, 378
The effect of diet on performance, blood composition and intestinal microflora of weaned pigs, 1396
Digestion
Effect of particle length and sodium hydroxide treatment of wheat straw on site and extent of, by lambs, 1454
Digestion, nutrient
Effects of lasalocid and monensin on, metabolism and rumen characteristics of sheep, 194
Dilution rate
Effects of solids and liquid flows on fermentation in continuous cultures.
IV. pH and, 692
Diurnal behavior
Patterns of feedlot bulls during winter and spring in northern latitudes, 1075

E

Ecology
Behavior and, of wild and feral swine (Sus scrofa), 474
Electrical activity
In the cerebral hemispheres of electrically stunned pigs, 68
Electrical stimulation
Influence of breed, sex, age and, on carcass and palatability traits of three bovine muscles, 1358
Elk
Comparison of in vivo and in vitro digestibility of forages by, 963
Embryo survival
Estrus, ovulation, conception and, in confinement-managed gilts of three weight groups, 281
Endocrine characteristics
Testicular development and, of boars selected for either high or low testis size, 675
Endocrine function
Relationships among measures of testicular development and, in boars, 1255
Energy
And protein utilization in growing cattle, 766
Energy deposition
Tissue protein and, in steers fed isocaloric diets with different levels of nitrogen, 444
Energy intake
Effect of, on the postpartum interval in beef cows and the adequacy of the cow's milk production for calf growth, 1068
Influence of protein intake, and stage of gestation on growth, reproductive performance, nitrogen balance and carcass composition in gestating gilts, 647
Relationship of lactation, and occurrence of postweaning estrus to body and backfat composition in sows, 1236
Energy levels
Effect of dietary protein and, on rumen fermentation in Holstein steers, 452
Energy requirements
The digestible, of lactating pony mares, 1382
Energy source
Use of carbohydrate and fat as, by obese and lean swine, 894
Environment
Biochemical studies on the fate of monensin in animals and in the, 1528
Environmental effects
Lamb production and its components in pure breeds and composite lines.
I. Seasonal and other, 285
Escherichia coli Bel15R
Effect of chlortetracycline on the spread of R-100 plasmid-containing, from experimentally infected pigs to uninfected pigs and chicks, 519
Estimate lean of pork carcasses
Revised approaches to, of known age or days on test, 335
Estradiol
Effect on monensin, controlled release implants and supplement on performance in grazing steers, 1062
Estradiol-17β
In vitro testosterone secretion by testicular tissue from young bulls and the effects of chronic and acute exposure to, 949
Pituitary-testicular responses of, -implanted bull calves to continuous versus pulsatile infusion of luteinizing hormone releasing hormone, 943
Relationships between LH and, after removal of luteal progesterone in the ewe, 396
Estrogen profiles
Serum luteinizing hormone and, before puberty in the gilt, 686
Estrogen replacement
Luteinizing hormone secretion in ovariectomized gilts: Effects of age, reproductive state and, 165
Estrous cycle
Insemination of Holstein heifers at a preset time after, synchronization using progesterone and prostaglandin, 792
Estrus
Effects of placement of intravaginal sponges on LH, FSH, and ovarian activity in mares during the nonbreeding season, 159
Ovulation, conception and embryo survival in confinement-managed gilts of three weight groups, 281
Postpartum nutrient intake and body condition: Effect on pituitary function and onset of, in beef cattle, 265
Relationship of lactation energy intake and occurrence of postweaning, to body and backfat composition in sows, 1236
Synchronized, and subsequent conception in dairy heifers treated with prostaglandin $F_2\alpha$.
I. Influence of stage of cycle at treatment, 805
Ewe
Relationships between LH and estradiol-17β after removal of luteal progesterone in the, 396
Steroid receptors in the myometrium during pregnancy in the, 1278
Ewes
Behavior of, and lambs subjected to restraint fostering, 1084
Uterine blood flow during early pregnancy in,: Interaction between the conceptus and the ovary bearing the corpus luteum, 423
Exercise
Effects of, during the growing-finishing period on performance, age at puberty and conception rate of gilts, 541
Exogenous progestogen
Luteinizing hormone secretion after withdrawal of, in heifers fed three levels of dietary energy, 151

F

Fat
Accretion of, and muscle in growing swine as assessed by ultrasonic methods, 324
Use of carbohydrates and, as energy source by obese and lean swine, 894
Fat probe
Frame score and, for predicting compositional characteristics of young beef bulls, 787
Fatty acid
Essential, status and characteristics associated with colostrum-deprived gnotobiotic and conventional lambs. Growth, organ development, cell

membrane integrity and factors associated with lower bowel function, 971
Fecal extracts
The effect of diet on fecal moisture, osmolarity of, products of bacterial fermentation and loss of minerals in feces of weaned pigs, 1403
Fecal moisture
The effect of diet on, osmolarity of fecal extracts, products of bacterial fermentation and loss of minerals in feces of weaned pigs, 1403
Feces
The effect of diet on fecal moisture, osmolarity of fecal extracts, products of bacterial fermentation and loss of minerals in, of weaned pigs, 1403
Feed additives
Fumaric and citric acid as, in starter pig nutrition, 935
Feed efficiency
A comparison of crossbred and straightbred cow-calf pairs.
I. Heterosis effects on total, 1151
Characterization of biological types of cattle (Cycle III)
IV. Postweaning growth and, 312
Effects of breed and intake level on growth and, in ram lambs, 560
Genetic and physiological aspects of growth, body composition and, in mice: A review, 577
Feeder calves
Effects of pretransit diets and post-transit potassium levels for, 700
Feedlot performance
Carcass quality, digestibility and, of swine fed various levels of sunflower seed, 1205
Relation of, and certain physiological responses to the metabolizable protein and urea content of cattle diets, 1285
Feral and wild sheep and goats
A review of the social behavior of, 500
Feral animal studies
In animal science: The uses and limitations of feral animal studies to contemporary animal science, 474
Feral horses and ponies
Behavior of, 493
Feral swine (Sus scrofa)
Behavior and ecology of wild and, 482
Fermentation
Effects of solids and liquid flows on, in continuous cultures.
IV. pH and dilution rate, 692
Fescue
Summer, toxicity in dairy steers fed tall fescue seed, 1057
Toxic factors in tall, 1011
Fetal hepatic
And neural substrate utilization as affected by induced nutritional ketosis in swine, 1388
Field records
An evaluation of bias in estimated breeding values for weaning weight in Angus beef cattle,.
I. Estimates of within herd genetic trend, 545
II. Estimates of bias due to genetic trend, 550
III. Estimates of bias due to nonrandom mating, 556
Fish meal
Amino acid availabilities in soybean meal, sunflower meal, and meat and bone meal fed to growing pigs, 926
Forage intake
Effect of level of, on rumen ammonia, pH, liquid volume and liquid dilution rate in beef cattle, 708
Forage labeling techniques
Comparison of, for conducting passage rate studies, 208
Forages
Comparison of in vivo and in vitro digestibility of, by elk, 963
Ingestive mastication and fragmentation of, 1567
Frame score
And fat probe for predicting compositional characteristics of young beef bulls, 787
FSH
Effects of placement of intravaginal sponges on LH, estrus and ovarian activity in mares during the nonbreeding season, 159
Pituitary responsiveness to GnRH, hypothalamic content of GnRH and pituitary LH and, concentrations immediately preceding puberty in gilts, 1423
Serum profiles of progesterone, LH, and prolactin immediately preceding induced puberty in gilts, 1262
Fumaric and citric acid
As feed additives in starter pig nutrition, 935
Fur growth
Induction of winter, in mink (Mustela vison) with melatonin, 57

G

Gastrointestinal tract
Nutritional effects on the distribution of live weight as, fill and tissue components in growing cattle, 753
Genetic
And phenotypic parameters for sow productivity, 1144
Genetic and phenotypic correlations
Estimates of heritabilities and of, among growth and reproductive traits in yearling Angus bulls, 887
Genetic and physiological
Aspects of growth, body composition and feed efficiency in mice: A review, 577
Genetic correlations
Among sex-limited traits in beef cattle, 1171
Genetic parameters
Estimation of, from multiple trait selection experiments, 591
Genetic trend
An evaluation of bias in estimated breeding values for weaning weight in Angus beef cattle field records.
I. Estimates of within herd, 545
II. Estimates of bias due to, 550
Estimation of, in a selected population with and without the use of a control population, 878
Gestation diets
Effect of lysine and threonine supplementation of sorghum, on nitrogen balance and plasma constituents in first-litter gilts, 631

Gestation, stage of
Influence of protein intake, energy intake and, on growth, reproductive performance, nitrogen balance and carcass composition in gestating gilts, 647
Gilt
Serum luteinizing hormone and estrogen profiles before puberty in the, 686
Gilts
Comparison of physiological indicators of chronic stress in confined and nonconfined, 401
Effect of lysine and threonine supplementation of sorghum gestation diets on nitrogen balance and plasma constituents in first-litter, 631
Effects of exercise during the growing-finishing period on performance, age at puberty and conception rate of, 541
Pituitary responsiveness to GnRH, hypothalamic content of GnRH and pituitary LH and FSH concentrations immediately preceding puberty in, 1423
Serum profiles of progesterone, LH, FSH and prolactin immediately preceding induced puberty in, 1262
Gilts, gestating
Influence of protein intake, energy intake and stage of gestation on growth, reproductive performance, nitrogen balance and carcass composition in, 647
Gilts, ovariectomized
Luteinizing hormone secretion in,: Effects of age, reproductive state and estrogen replacement, 165
Glucocorticoids
Depression of glucoronyltransferase activity by, in adult female mice, 1412
Glucoronyltransferase activity
Depression of, by glucocorticoids in adult female mice, 1412
Glucose
Evidence that phosphofructokinase limits, utilization in bovine adipose tissue, 1198
Role of insulin and, on metabolite uptake by the hind half of beef steers, 1446
Glucose metabolism
Isolation-perfusion of ovine hind limbs.
IV. Effects of level of activity on amino acid and, 1437
Glutathione peroxidase activity in pigs
Effect of selenium on performance, serum selenium concentration and, 346
GnRH
Pituitary responsiveness to, hypothalamic content of GnRH and pituitary LH and FSH concentrations immediately preceding puberty in gilts, 1423
Testosterone effects on gonadotropin response to,: Cows and pony mares, 409
Goats
A review of the social behavior of feral and wild sheep and, 500
Gonadotropin response
Testosterone effects on, to GnRH: Cows and pony mares, 409
Grain
The nutritional value of high moisture and reconstituted sorghum, for swine, 1222
Grain diet
Effects of a grass or, on the quality of three beef muscles, 619
Grains
Nutritive value of reconstituted sorghum, for weanling pigs, 1211
Grass
Effects of a, or grain diet on the quality of three beef muscles, 619
Grass, Coastal Bermuda
Nitrogen metabolism of steers fed sun-cured hay and drum dehydrated alfalfa and, 987
Grasses, perennial
Grazing evaluation of, with yearling steers in peninsular Florida, 535
Gravid swine
Effect of particle size and physical form of sun-cured alfalfa on digestibility for, 378
Grazing evaluation
Of perennial grasses with yearling steers in peninsular Florida, 535
Growing cattle
A system for predicting body composition and performance of, 725
Energy and protein utilization in, 766
Nutritional effects on the distribution of live weight as gastrointestinal tract fill and tissue components in, 753
Growing-finishing
Effects of exercise during the, period on performance, age at puberty and conception rate of gilts, 541
Growing swine
Nutritional manipulation and interpretation of body composition differences in, 740
Growth
Effects of breed and intake level on, and feed efficiency in ram lambs, 560
Essential fatty acid status and characteristics associated with colostrum-deprived gnotobiotic and conventional lambs. Organ development, cell membrane integrity and factors associated with lower bowel function, 971
Estimates of heritabilities and of genetic and phenotypic correlations among, and reproductive traits in yearling Angus bulls, 887
Genetic and physiological aspects of, body composition and feed efficiency in mice: A review, 577
Influence of protein intake, energy intake and stage of gestation on, reproductive performance, nitrogen balance and carcass composition in gestating gilts, 647
Performance of crosses among Hereford, Angus and Simmental cattle with different levels of Simmental breeding.
I. Preweaning, and survival, 1321
Postnatal litter size effects on, and reproduction in rats, 1337
Transmitted effect of purebred versus crossbred rams on rate and variability of lamb, 1138
Growth hormone
Effects of ovine, and other anterior pituitary hormones on lipolysis of rat and ovine adipose tissue in vitro, 1191
Growth hormone-releasing factors
Growth hormone response of steers injected with

synthetic human pancreatic, 430
Growth hormone response
Of steers injected with synthetic human pancreatic growth hormone-releasing factors, 430
Growth, lean
Selection for rate and for efficiency of, in rats: Responses to selection and relaxation of selection, 831
Growth stimulants
Relationship of, and breed groups on carcass characteristics and palatability of young bulls, 920

H

Hams, dry-cured
Vacuum tumbling of, 1376
Hay, suncured
Nitrogen metabolism of steers fed, and drum dehydrated alfalfa and Coastal Bermuda grass, 987
Heat stress
Effects of, during pregnancy on postpartum reproductive changes in Holstein cows, 174
Heifers
Investigations of the in situ bag technique and a comparison of the fermentation in, sheep, ponies and rabbits, 213
Luteinizing hormone secretion after withdrawal of exogenous progestogen in, fed three levels of dietary energy, 151
Negative feedback control of luteinizing hormone secretion in prepubertal beef, at 60 and 200 days of age, 145
Heifers, dairy
Synchronized estrus and subsequent conception in, treated with prostaglandin $F_2\alpha$.
I. Influence of stage of cycle at treatment, 805
Heifers, Holstein
Carcass composition and mammary development response to photoperiod and plane of nutrition in, 913
Hepatic metabolism
And bioactivation of mycotoxins and plant toxins, 1017
Hereford
Performance of crosses among, Angus and Simmental cattle with different levels of Simmental breeding.
I. Preweaning growth and survival, 1321
II. Effect of calf breed on cow productivity, 1329
Heritabilities
Estimates of, and of genetic and phenotypic correlations among growth and reproductive traits in yearling Angus bulls, 887
Heterosis
A comparison of crossbred and straightbred cow-calf pairs.
I., Effects on total feed efficiency, 1151
Lamb production and its components in pure breeds and composite lines.
II. Breed effects and, 301
Hind half
Role of insulin and glucose on metabolite uptake by the, of beef steers, 1446
Holstein bull
Evaluation of two seminal collection regimens for mature, 1
Holstein cows
Effects of heat stress during pregnancy on postpartum reproductive changes in, 174
Holstein heifers
Carcass composition and mammary development responses to photoperiod and plane of nutrition in, 913
Insemination of, at a preset time after estrous cycle synchronization using progesterone and prostaglandin, 792
Holstein steers
Effect of dietary protein and energy levels on rumen fermentation in, 452
Horses
The influence of dietary fiber digestibility on the nitrogen requirements of mature, 631
Hot processing systems
Comparison of, for pork, 605
Hypothalamic content
Pituitary responsiveness to GnRH, content of GnRH and pituitary LH and FSH concentrations immediately preceding puberty in gilts, 1423

I

Implants
Effect of monensin, estradiol controlled release and supplement on performance in grazing steers, 1062
In situ bag technique
Investigations of the, and a comparison of the fermentation in heifers, sheep, ponies and rabbits, 213
In vitro
Effects of ovine growth hormone and other anterior pituitary hormones on lipolysis of rat and ovine adipose tissue, 1191
In vitro digestibility
Comparison of in vivo and, of forages by elk, 963
In vitro testosterone secretion
By testicular tissue from young bulls and the effects of chronic and acute exposure to extradiol-17β, 949
In vivo
Comparison of, and in vitro digestibility of forages by elk, 963
Indolic compounds
Ruminal metabolism of plant toxins with emphasis in, 1040
Infection
Influence of an experimental, of strongyloides ransomi on performance of pigs, 1231
Insemination
Of Holstein heifers at a preset time after estrous cycle synchronization using progesterone and prostaglandin, 792
Sex ratio after, of bovine spermatozoa isolated using a bovine serum albumin gradient, 1432
Insulin
Role of, and glucose on metabolite uptake by the hind half of beef steers, 1446
Intake level
Effects of breed and, on growth and feed efficiency in ram lambs, 560

Intestinal microflora
The effect of diet on performance, digestibility, blood composition and, of weaned pigs, 1396
Intravaginal sponges
Effect of placement of, on LH, FSH, estrus and ovarian activity in mares during the nonbreeding season, 159
Ionophores
Their effect on production efficiency and mode of action, 1465
Isocaloric diets
Tissue protein and energy deposition in steers fed, with different levels of nitrogen 444
Isolation-perfusion
Of ovine hind limbs.
IV. Effects of level of activity on amino acid glucose metabolism, 1437

K

Ketosis
Fetal hepatic and neural substrate utilization as affected by induced nutritional, in swine, 1388

L

Lactating
The digestible energy requirements of, pony mares, 1382
Lactation
Relationship of, energy intake and occurrence of postweaning estrus to body and backfat composition in sows, 1236
Lamb carcasses
Effects of breed and castration on conformation, classification, tissue distribution, composition and quality of, 1343
Lamb growth
Transmitted effect of purebred versus crossbred rams on rate and variability of, 1138
Lamb production
And its components in pure breeds and composite lines.
I. Seasonal and other environmental effects, 285
II. Breed effects and heterosis, 301
Lambs
Acetate and propionate production in the cecum and proximal colon of, 203
Behavior of ewes and, subjected to restraint fostering, 1084
Effect of particle length and sodium hydroxide treatment of wheat straw on site and extent of digestion by, 1454
Lambs, gnotobiotic and conventional
Essential fatty acid status and characteristics associated with colostrum-deprived,. Growth, organ development, cell membrane integrity and factors associated with lower bowel function, 971
Lasalocid
Effects of, and monensin on nutrient digestion, metabolism and rumen characteristics of sheep, 194
Performance, ruminal and serum characteristics of steers fed, on pasture, 460
Lean swine, obese and
Use of carbohydrate and fat as energy source by, 894
Least-squares
Estimation of response to selection using, and mixed model methodology, 1097
LH
Effects of placement of intravaginal sponges on, FSH, estrus and ovarian activity in mares during the nonbreeding season, 159
Serum profiles of progesterone, FSH and prolactin immediately preceding induced puberty in gilts, 1262
LH and estradiol-17β
Relationships between, after removal of luteal progesterone in the ewe, 396
Lipid coating
As a mode of protecting free methionine from ruminal degradation, 187
Lipogenic activity
Effect of sex on, in swine adipose tissue, 600
Lipolysis
Effects of ovine growth hormone and other anterior pituitary hormones on, of rat and ovine adipose tissue in vitro, 1191
Liquid dilution
Effect of level of forage intake on rumen ammonia, pH, liquid volume and, rate in beef cattle, 708
Liquid flows
Effects of solids and, on fermentation in continuous cultures.
IV. pH and dilution rate, 692
Liquid volume
Effect of level of forage intake on rumen ammonia, pH, and liquid dilution rate in beef cattle, 708
Live weight
Nutritional effects on the distribution of, as gastrointestinal tract fill and tissue components in growing cattle, 753
Livers
Oxidative and conjugative metabolism of xenobiotics by, of cattle, sheep, swine and rats, 386
Longissimus muscle
Factors affecting the formation of a dark, coarse band ("heat-ring") in bovine, 1366
Luteal progesterone
Relationships between LH and estradiol-17β after removal of, in the ewe, 396
Luteinizing hormone
Effect of castration on plasma, concentrations in prepubertal boars, 1271
Negative feedback control of, secretion in prepubertal beef heifers at 60 and 200 days of age, 145
Secretion after withdrawal of exogenous progestogen in heifers fed three levels of dietary energy, 151
Secretion in ovariectomized gilts: Effects of age, reproductive state and estrogen replacement, 165
Serum, and estrogen profiles before puberty in the gilt, 686
Luteinizing hormone releasing hormone
Pituitary-testicular responses of estradiol-17β-implanted bull calves to continuous versus pul-

satile infusion of, 943
Lysine
Effect of, and threonine supplementation of sorghum gestation diets on nitrogen balance and plasma constituents in first-litter gilts, 631
Effects of excess arginine with and without supplemental, on performance, plasma amino acid concentrations and nitrogen balance of young swine, 369
The, requirement of the growing boar versus barrow, 657
Lysine ratios
Effect of various dietary arginine:, on performance, carcass composition and plasma amino acid concentrations of growing-finishing swine, 362

M

Magnesium
Oxalic acid content of alfalfa hays and its influence on the availability of calcium, phosphorus and, to ponies, 939
Mammary development
Carcass composition and, responses to photoperiod and plane of nutrition in Holstein heifers, 913
Mares
Effects of placement of intravaginal sponges on LH, FSH, estrus and ovarian activity in, during the nonbreeding season, 159
The digestible energy requirements of lactating pony, 1382
Mares, pony
Testosterone effects on gonadotropin response to GnRH: Cows and, 409
Mastication, ingestive
And fragmentation of forages, 1567
Mathematical modeling
Of alternative culling and crossbreeding strategies in beef production, 6
Meat
Amino acid availabilities in soybean meal, sunflower meal, fish meal and, and bone meal fed to growing pigs, 926
Meat industry
The importance of campylobacter jejuni to the,: A review, 1561
Mechanical tenderization
Effects of, and cooking treatments upon product attributes of pre- and post-rigor beef roasts, 626
Melatonin
Induction of winter fur growth in mink (Mustela vison) with, 57
Memorials
Ralph E. Erb, 510
Elmer Roberts, 256
Metabolism
Effects of lasalocid and monensin on nutrient digestion, and rumen characteristics of sheep, 194
Metabolism, glucose
Isolation-perfusion of ovine hind limbs.
IV. Effects of level of activity on amino acid and, 1437
Metabolism, hepatic
And bioactivation of mycotoxins and plant toxins, 1017
Metabolism, nitrogen
Of steers fed suncured hay and drum dehydrated alfalfa and Coastal Bermuda grass, 987
Metabolism, oxidative and conjugative
Of xenobiotics by livers of cattle, sheep, swine and rats, 386
Metabolism, ruminal
Of plant toxins with emphasis on indolic compounds, 1040
Metabolite uptake
Role of insulin and glucose on, by the hind half of beef steers, 1446
Metabolites
Mutagenic responses of tansy ragwort (Senecio jacobaea) plant, pyrrolizidine alkaloids and, in goat milk with the salmonella/mammalian-microsome mutagenicity test, 1245
Methionine
Evaluation of, supplementation to diets containing cassava meal for swine, 812
Methionine, free
Lipid coating as a mode of protecting, from ruminal degradation, 187
Mice
Depression of glucoronyltransferase activity by glucocorticoids in adult female, 1412
Estimating body composition in, by near-infrared spectrophotometry, 1181
Genetic and physiological aspects of growth, body composition and feed efficiency in,: A review, 577
Postpartum performance in a diallel cross among lines of, selected for litter size and body weight, 863
Reproductive performance in a diallel cross among lines of, selected for litter size and body weight, 846
Milk, goat
Mutagenic responses of tansy ragwort (Senecio jacobaea) plant, pyrrolizidine alkaloids and metabolites in, with the salmonella/mammalian-microsome mutagenicity test, 1245
Milk production
Effect of energy intake on the postpartum interval in beef cows and the adequacy of the cow's, for calf growth, 1068
Minerals
The effect of diet on fecal moisture, osmolarity of fecal extracts, products of bacterial fermentation and loss of, in feces of weaned pigs, 1403
Mink (Mustela vison)
Induction of winter fur growth, with melatonin, 57
Mixed model methodology
Comparison of an animal model and an equivalent reduced animal model for computational efficiency using, 1090
Estimation of response to selection using least-squares and, 1097
Mode of action
Ionophores: Their effect on production efficiency and, 1465
Monensin
Biochemical studies on the fate of, in animals and the environment, 1528
Comparative toxicology of, sodium in laboratory animals, 1512
Effect of, estradiol controlled release implants and

supplement on performance in grazing steers, 1062
Effects of lasalocid and, on nutrient digestion, metabolism and rumen characteristics of sheep, 194
In cattle: Introduction, 1461
Influence of, on the performance of cattle, 1484
Mode of action in the rumen, 1518
Toxicity in cattle, 1499
Multiple trait selection experiments
Estimation of genetic parameters from, 591
Muscle
Accretion of fat and, in growing swine as assessed by ultrasonic methods, 324
Muscle, bovine longissimus
Factors affecting the formation of a dark, coarse band ("heat-ring") in, 1366
Muscles, bovine
Influence of breed, sex, age and electrical stimulation on carcass and palatability traits of three, 1358
Mutagenic responses
Of tansy ragwort (Senecio jacobaea) plant, pyrrolizidine alkaloids and metabolites in goat milk with the salmonella/mammalian-microsome mutagenicity test, 1245
Mycotoxins
Hepatic metabolism and bioactivation of, and plant toxins, 1017
Myometrium
Steroid receptors in the, during pregnancy in the ewe, 1278

N

Negative feedback control
Of luteinizing hormone secretion in prepubertal beef heifers at 60 and 200 days of age, 145
Neural substrate
Fetal hepatic and, utilization as affected by induced nutritional ketosis in swine, 1388
News and notes
257, 512, 779, 1050, 1300, 1575
Nitrogen
Effect of lysine and threonine supplementation of sorghum gestation diets on, balance and plasma constituents in first-litter gilts, 631
Effects of excess arginine with and without supplemental lysine on performance, plasma amino acid concentrations and, balance of young swine, 369
Influence of protein intake, energy intake and stage of gestation on growth, reproductive performance, balance and carcass composition in gestating gilts, 647
Metabolism of steers fed suncured hay and drum dehydrated alfalfa and Coastal Bermuda grass, 987
The influence of dietary fiber digestibility on the, requirements of mature horses, 638
Tissue protein and energy deposition in steers fed isocaloric diets with different levels of, 444
Nitrogen solubility
Evaluation of, and the Dacron bag technique as methods for estimating protein degradation in the rumen, 714
Nonrandom mating
An evaluation of bias in estimated breeding values for weaning weight in Angus beef cattle field records.
III. Estimates of bias due to, 556
Nutrient digestibility
Effect of supplemental selenium on pancreatic function and, in the pig, 351
Nutrients
And toxicants in rapeseed meal: A review, 996
Nutrition
Carcass composition and mammary development responses to photoperiod and plane of, in Holstein heifers, 913
Fumaric and citric acid as feed additives in starter pig, 935
Nutritional effects
On the distribution of live weight as gastrointestinal tract fill and tissue components in growing cattle, 753
Nutritional manipulation and interpretation
Of body compositional differences in growing swine, 740

O

Obese and lean swine
Use of carbohydrate and fat as energy source by, 894
Organ development
Essential fatty acid status and characteristics associated with colostrum-deprived gnotobiotic and conventional lambs. Growth, cell membrane integrity and factors associated with lower bowel function, 971
Ovarian
Effects of placement of intravaginal sponges on LH, FSH, estrus and, activity in mares during the nonbreeding season, 159
Ovary
Uterine blood flow during early pregnancy in ewes: Interaction between the conceptus and the, bearing the corpus luteum, 423
Ovine corpora lutea
Effect of prostaglandin $F_2\alpha$ on the adenylate cyclase and phosphodiesterase activity of, 955
Ovine growth hormone
Effects of, and other anterior pituitary hormones on lipolysis of rat and ovine adipose tissue in vitro, 1191
Ovine hind limbs
Isolation-perfusion of,.
IV. Effects of level of activity on amino acid and glucose metabolism, 1437
Ovulation
Estrus, conception and embryo survival in confinement-managed gilts of three weight groups, 281
Oxalic acid
Content of alfalfa hays and its influence on the availability of calcium, phosphorus and magnesium to ponies, 939

P

Palatability

Relationship of growth stimulants and breed groups on carcass characteristics and, of young bulls, 920
Palatability traits
Influence of breed, sex, age and electrical stimulation on carcass and, of three bovine muscles, 1358
Pancreatic function
Effect of suplemental selenium on, and nutrient digestibility in the pig, 351
Passage rate studies
Comparison of forage labeling techniques for conducting, 208
Performance
Effect of monensin, estradiol controlled release implants and supplement on, in grazing steers, 1062
Effect of various dietary arginine:lysine ratios on, carcass composition and plasma amino acid concentrations of growing-finishing swine, 362
Effects of excess arginine with and without supplemental lysine on, plasma amino acid concentrations and nitrogen balance of young swine, 369
Effects of exercise during the growing-finishing period on, age at puberty and conception rate of gilts, 541
Ruminal and serum characteristics of steers fed lasalocid on pasture, 460
The effect of diet on, digestibility, blood composition and intestinal microflora of weaned pigs, 1396
Performance of cattle
Influence of monensin on the, 1484
Performance of growing cattle
A system for predicting body composition and, 725
pH
Effect of level of forage intake on rumen ammonia, liquid volume and liquid dilution rate in beef cattle, 708
Effects of solids and liquid flows on fermentation in continuous cultures.
IV., And dilution rate, 692
Phenotypic
Genetic and, parameters for sow productivity, 1144
Phenotypic correlations, genetic and
Estimates of heritabilities and of, among growth and reproductive traits in yearling Angus bulls, 887
Phosphodiesterase activity
Effect of prostaglandin $F_2\alpha$ on the adenylate cyclase and, of ovine corpora lutea, 955
Phosphofructokinase
Evidence that, limits glucose utilization in bovine adipose tissue, 1198
Phosphorus
Interactive effects of dietary calcium, and copper on performance and liver stores of pigs, 356
Oxalic acid content of alfalfa hays and its influence on the availability of calcium, and magnesium to ponies, 939
Photoperiod
Carcass composition and mammary development responses to, and plane of nutrition in Holstein heifers, 913
Photoperiods
The effects of different, on reproduction in the sow, 1418
Pig
Effect of supplemental selenium on pancreatic function and nutrient digestibility in the, 351
Pig fetuses
Histochemical and cellular aspects of adipose tissue development in decapitated,: An ontogeny study, 1540
Pig, starter
Fumaric and citric acid as feed additives in, nutrition, 935
Pigs
Amino acid availabilities in soybean meal, sunflower meal, fish meal and meat and bone meal fed to growing, 926
Effect of chlortetracycline on the spread of R-100 plasmid-containing Escherichia coli Bel15R from experimentally infected, to uninfected pigs and chicks, 519
Effect of selenium on performance, serum selenium concentration and glutathione peroxidase activity in, 346
Estimation of body composition of, 903
Influence of an experimental infection of strongyloides ransomi on performance of, 1231
Interactive effects of dietary calcium, phosphorus and copper on performance and liver stores of, 356
Responses of weanling, to dietary supplementation with vitamin C or carbadox, 132
The development of the inner layer of backfat in fetal and young, 1550
Pigs, nursery
Effect of space allowance and antibiotic feeding on performance of, 801
Pigs, weaned
The effect of diet on fecal moisture, osmolarity of fecal extracts, products of bacterial fermentation and loss of minerals in feces of, 1403
The effect of diet on performance, digestibility, blood composition and intestinal microflora of, 1396
Pigs, weanling
Nutritive value of reconstituted sorghum grains for, 1211
Pituitary function
Postpartum nutrient intake and body condition: Effect on, and onset of estrus in beef cattle, 265
Pituitary hormones
Effects of ovine growth hormone and other anterior, on lipolysis of rat and ovine adipose tissue in vitro, 1191
Pituitary LH
Pituitary responsiveness to GnRH, hypothalamic content of GnRH and, FSH concentrations immediately preceding puberty in gilts, 1423
Pituitary responsiveness
To GnRH, hypothalamic content of GnRH and pituitary LH and FSH concentrations immediately preceding puberty in gilts, 1423
Pituitary-testicular responses
Of estradiol-17β-implanted bull calves to continuous versus pulsatile infusion of luteinizing hormone releasing hormone, 943

Placement
260, 515, 782, 1052, 1302, 1577
Plant toxins
Hepatic metabolism and bioactivation of mycotoxins and, 1017
Ruminal metabolism of, with emphasis on indolic compounds, 1040
Plants
Teratogens in, 1029
Plasma amino acid
Effect of various dietary arginine:lysine ratios on performance, carcass composition and, concentrations of growing-finishing swine, 362
Effects of excess arginine with and without supplemental lysine on performance, concentrations and nitrogen balance of young swine, 369
Plasma constituents
Effect of lysine and threonine supplementation of sorghum gestation diets on nitrogen balance and, in first-litter gilts, 631
Plasma luteinizing hormone
Effect of castration on, concentrations in prepubertal boars, 1271
Polypay
Development of the, breed of sheep, 15
Ponies
Behavior of feral horses and, 493
Investigations of the in situ bag technique and a comparison of the fermentation in heifers, sheep, and rabbits, 213
Oxalic acid content of alfalfa hays and its influence on the availability of calcium, phosphorus and magnesium to, 939
Pony mares
Testosterone effects on gonadotropin response to GnRH: Cows and, 409
The digestible energy requirements of lactating, 1382
Pork
Comparison of hot processing systems for, 605
Prediction of, belly composition using various measurements of the carcass or belly, 611
Pork carcasses
Revised approaches to estimate lean of, of known age or days on test, 335
Postnatal litter
Size effects on growth and reproduction in rats, 1337
Postpartum
Effect of energy intake on the, interval in beef cows and the adequacy of the cow's milk production for calf growth, 1068
Postpartum nutrient intake
And body condition: Effect on pituitary function and onset of estrus in beef cattle, 265
Postpartum performance
In a diallel cross among lines of mice selected for litter size and body weight, 863
Postpartum reproductive changes
Effects of heat stress during pregnancy on, in Holstein cows, 174
Postweaning
And carcass traits of steers, grading and rotational crossbreeding of beef cattle, 47
Relationship of lactation energy intake and occurrence of, estrus to body and backfat composition in sows, 1236
Postweaning efficiency
Life cycle efficiency of beef production:
III. Components of, and efficiency to the slaughter end point, 1107
Postweaning growth
Characterization of biological types of cattle (Cycle III)
IV., And feed efficiency, 312
Postweaning swine
Effect of inorganic selenium supplementation on selenosis in, 1216
Potassium
Effects of pretransit diets and post-transit, levels for feeder calves, 700
Potato-corn biosolids
Utilization of, single-cell protein and potato-corn primary waste by beef cattle, 1292
Potato-corn primary waste
Utilization of potato-corn biosolids single-cell protein and, by beef cattle, 1292
Pregnancy
Effects of heat stress during, on postpartum reproductive changes in Holstein cows, 174
Steroid receptors in the myometrium during, in the ewe, 1278
Uterine blood flow during early, in ewes: Interaction between the conceptus and the ovary bearing the corpus luteum, 423
Pre- and post-rigor beef roasts
Effects of mechanical tenderization and cooking treatments upon product attributes of, 626
Prepubertal beef heifers
Negative feedback control of luteinizing hormone secretion in, at 60 and 200 days of age, 145
Product attributes
Effects of mechanical tenderization and cooking treatments upon, of pre- and post-rigor beef roasts, 626
Production efficiency
Ionophores: Their effect on, and mode of action, 1465
Progeny test
Comparison of beef sire evaluation models for an organized, 1313
Progesterone
Insemination of Holstein heifers at a preset time after estrous cycle synchronization using, and prostaglandin, 792
Serum profiles of, LH, FSH and prolactin immediately preceding induced puberty in gilts, 1262
Prolactin
Serum profiles of progesterone, LH, FSH and, immediately preceding induced puberty in gilts, 1262
Propionate
Acetate and, production in the cecum and proximal colon of lambs, 203
Prostaglandin
Insemination of Holstein heifers at a preset time after estrous cycle synchronization using progesterone and, 792
Prostaglandin $F_2\alpha$
Effect of, on the adenylate cyclase and phosphodiesterase activity of ovine corpora lutea, 955
Synchronized estrus and subsequent conception in dairy heifers treated with,.
I. Influence of stage of cycle at treatment, 805

Protein
Degradation in the rumen and amino acid absorption in the small intestine of lactating dairy cattle fed various protein sources, 244
Energy and, utilization in growing cattle, 766
Relation of feedlot performance and certain physiological responses to the metabolizable, and urea content of cattle diets, 1285
Protein degradation
Amino acids released during, by rumen microbes, 436
Evaluation of nitrogen solubility and the Dacron bag technique as methods for estimating, in the rumen, 714
Protein intake
Influence of, energy intake and stage of gestation on growth, reproductive performance, nitrogen balance and carcass composition in gestating gilts, 647
Protein, single-cell
Utilization of potato-corn biosolids, and potato-corn primary waste by beef cattle, 1292
Puberty
Serum luteinizing hormone and estrogen profiles before, in the gilt, 686
Serum profiles of progesterone, LH, FSH and prolactin immediately preceding induced, in gilts, 1262
Puberty in gilts
Pituitary responsiveness to GnRH, hypothalamic content of GnRH and pituitary LH and FSH concentrations immediately preceding, 1423
Pyrrolizidine alkaloids
Mutagenic responses of tansy ragwort (Senecio jacobaea) plant, and metabolites in goat milk with the salmonella/mammalian-microsome mutagenicity test, 1245

R

R-100 plasmid-containing Escherichia coli Bel15R
Effect of chlortetracycline on the spread of, from experimentally infected pigs to uninfected pigs and chicks, 519
Rabbits
Investigations of the in situ bag technique and a comparison of the fermentation in heifers, sheep, ponies, and, 213
Proximate composition and sensory characteristics of meat from, fed three levels of alfalfa meal, 62
Ram lambs
Effects of breed and intake level on growth and feed efficiency in, 560
Rams
Seasonal changes in breeding activity, testicular size, testosterone concentration and seminal characteristics in, with long or short breeding season, 416
Transmitted effect of purebred versus crossbred, on rate and variability of lamb growth, 1138
Rapeseed meal
Nutrients and toxicants in,: A review, 996
Rat
Effects of ovine growth hormone and other anterior pituitary hormones on lipolysis of, and ovine adipose tissue in vitro, 1191
Rats
Evaluation of amino acids, B vitamins and butylated hydroxyanisole as protective agents against pyrrolizidine alkaloid toxicity in, 138
Oxidative and conjugative metabolism of xenobiotics by livers of cattle, sheep, swine and, 386
Postnatal litter size effects on growth and reproduction in, 1337
Selection for rate and for efficiency of lean growth in,: Responses to selection and relaxation of selection, 831
Reproduction
Postnatal litter size effects on growth and, in rats, 1337
The effects of different photoperiods on, in the sow, 1418
Reproductive changes, postpartum
Effects of heat stress during pregnancy on, in Holstein cows, 174
Reproductive performance
Grading and rotational crossbreeding of beef cattle, 25
In a diallel cross among lines of mice selected for litter size and body weight, 846
Influence of protein intake, energy intake and stage of gestation on growth, nitrogen balance and carcass composition in gestating gilts, 647
Reproductive state
Luteinizing hormone secretion in ovariectomized gilts: Effects of age, and estrogen replacement, 165
Reproductive traits
Estimates of heritabilities and of genetic and phenotypic correlations among growth and, in yearling Angus bulls, 887
Restraint fostering
Behavior of ewes and lambs subjected to, 1084
Rotational crossbreeding
Grading and, of beef cattle,
I. Reproductive performance, 25
II. Calf performance to weaning, 38
III. Postweaning and carcass traits, 47
Rumen
Evaluation of nitrogen solubility and the Dacron bag technique as methods for estimating protein degradation in the, 714
Monensin mode of action in the, 1518
Protein degradation in the, and amino acid absorption in the small intestine of lactating dairy cattle fed various protein sources, 244
Ytterbium chloride as a marker for particulate matter in the, 465
Rumen ammonia
Effect of level of forage intake on, pH, liquid volume and liquid dilution rate in beef cattle, 708
Rumen characteristics
Effects of lasalocid and monensin on nutrient digestion, metabolism and, of sheep, 194
Rumen fermentation
Effect of dietary protein and energy levels on, in Holstein steers, 452
Rumen microbes
Amino acids released during protein degradation by, 436
Ruminal
Performance, and serum characteristics of steers fed lasalocid on pasture, 460

Ruminal degradation
Lipid coating as a mode of protecting free methionine from, 187
Ruminal metabolism
Of plant toxins with emphasis on indolic compounds, 1040

S

Salmonella/mammalian-microsome mutagenicity test
Mutagenic responses of tansy ragwort (Senecio jacobaea) plant, pyrrolizidine alkaloids and metabolites in goat milk with the, 1245
Seed, fescue
Summer fescue toxicity in dairy steers fed tall, 1057
Selection
Estimation of response to, using least-squares and mixed model methodology, 1097
For rate and for efficiency of lean growth in rats: Responses to selection and relaxation of selection, 831
Selenium
Effect of inorganic, supplementation on selenosis in postweaning swine, 1216
Effect of, on performance, serum selenium concentration and glutathione peroxidase activity in pigs, 346
Selenium, supplemental
Effect of, on pancreatic function and nutrient digestibility in the pig, 351
Selenosis
Effect of inorganic selenium supplementation on, in postweaning swine, 1216
Seminal characteristics
Seasonal changes in breeding activity, testicular size, testosterone concentration and, in rams with long or short breeding season, 416
Seminal collection
Evaluation of two regimens for mature Holstein bulls, 1
Sensory characteristics
Proximate composition and, of meat from rabbits fed three levels of alfalfa meal, 62
Serum
Performance, ruminal and, characteristics of steers fed lasalocid on pasture, 460
Serum bovine
Sex ratio after insemination of bovine spermatozoa isolated using a, albumin gradient, 1432
Serum profiles
Of progesterone, LH, FSH and prolactin immediately preceding induced puberty in gilts, 1262
Serum selenium concentration
Effect of selenium on performance, and glutathione peroxidase activity in pigs, 346
Sex
Effect of, on lipogenic activity in swine adipose tissue, 600
Influence of breed, age and electrical stimulation on carcass and palatability traits of three bovine muscles, 1358
Sex ratio
After insemination of bovine spermatozoa isolated using a bovine serum albumin gradient, 1432
Sex-limited traits
Genetic correlations among, in beef cattle, 1171
Sheep
A review of the social behavior of feral and wild, and goats, 500
Development of the Polypay breed of, 15
Effects of lasalocid and monensin on nutrient digestion, metabolism and rumen characteristics of, 194
Investigations of the in situ bag technique and a comparison of the fermentation in heifers, ponies and rabbits, 213
Oxidative and conjugative metabolism of xenobiotics by livers of cattle, swine and rats, 386
Simmental
Performance of crosses among Hereford, Angus and, cattle with different levels of Simmental breeding.
I. Preweaning growth and survival, 1321
II. Effect of calf breed on cow productivity, 1329
Sire evaluation models, beef
Comparison of, for an organized progeny test, 1313
Slaughter end point
Life cycle efficiency of beef production:
III. Components of postweaning efficiency and efficiency to the, 1107
Social behavior
A review of the, of feral and wild sheep and goats, 500
Sodium hydroxide treatment
Effect of particle length and, of wheat straw on site and extent of digestion by lambs, 1454
Sodium, monensin
Comparative toxicology of, in laboratory animals, 1512
Solids
Effects of, and liquid flows on fermentation in continuous cultures.
IV. pH and dilution rate, 692
Sorghum
Nutritive value of reconstituted, grains for weanling pigs, 1211
The nutritional value of high moisture and reconstituted, grain for swine, 1222
Sow
The effects of different photoperiods on reproduction in the, 1418
Sow productivity
Genetic and phenotypic parameters for, 1144
Sows
Relationship of lactation energy intake and occurrence of postweaning estrus to body and backfat composition in, 1236
Soybean meal
Amino acid availabilities in, sunflower meal, fish meal and meat and bone meal fed to growing pigs, 926
Space allowance
Effect of, and antibiotic feeding on performance of nursery pigs, 801
Spectrophotometry
Estimating body composition in mice by near-infrared, 1181
Spermatozoa, bovine
Sex ratio after insemination of, isolated using a bovine serum albumin gradient, 1432
Steers

Grading and rotational crossbreeding of beef cattle.
III. Postweaning and carcass traits of, 47
Growth hormone response of, injected with synthetic human pancreatic growth hormone-releasing factors, 430
Nitrogen metabolism of, fed suncured hay and drum dehydrated alfalfa and Coastal Bermuda grass, 987
Performance, ruminal and serum characteristics of, fed lasalocid on pasture, 460
Tissue protein and energy deposition in, fed isocaloric diets with different levels of nitrogen, 444
Steers, beef
Role of insulin and glucose on metabolite uptake by the hind half of, 1446
Steers, dairy
Summer fescue toxicity in, fed tall fescue seed, 1057
Steers, grazing
Effect of monensin, estradiol controlled release implants and supplement on performance in, 1062
Steers, Holstein
Effect of dietary protein and energy levels on rumen fermentation in, 452
Steers, yearling
Grazing evaluation of perennial grasses with, in peninsular Florida, 535
Influence of pretransit zeranol implant and receiving diet protein and urea levels on performance of, 527
Steroid receptors
In the myometrium during pregnancy in the ewe, 1278
Straightbred
A comparison of crossbred and, cow-calf pairs.
I. Heterosis effects on total feed efficiency, 1151
II. Biological efficiency of the cow-calf unit, 1160
Stress, chronic
Comparison of physiological indicators of, in confined and nonconfined gilts, 401
Strongyloides ransomi
Influence of an experimental infection of, on performance of pigs, 1231
Sunflower meal
Amino acid availabilities in soybean meal, fish meal and meat and bone meal fed to growing pigs, 926
Sunflower seed
Carcass quality, digestibility and feedlot performance of swine fed various levels of, 1205
Supplement
Effect of monensin, estradiol controlled release implants and, on performance in grazing steers, 1062
Survival
Performance of crosses among Hereford, Angus and Simmental cattle with different levels of Simmental breeding.
I. Preweaning growth and, 1321
Swine
Accretion of fat and muscle in growing, as assessed by ultrasonic methods, 324
Antibiotic resistance of fecal coliforms from, fed subtherapeutic and therapeutic levels of chlortetracycline, 666
Carcass quality, digestibility and feedlot performance of, fed various levels of sunflower seed, 1205
Effect of inorganic selenium supplementation on selenosis in postweaning, 1216
Effect of sex on lipogenic activity in, adipose tissue, 600
Effects of excess arginine with and without supplemental lysine on performance, plasma amino acid concentrations and nitrogen balance of young, 369
Evaluation of methionine supplementation to diets containing cassava meal for, 812
Fetal hepatic and neural substrate utilization as affected by induced nutritional ketosis in, 1388
Nutritional manipulation and interpretation of body compositional differences in growing, 740
Oxidative and conjugative metabolism of xenobiotics by livers of cattle, sheep, and rats, 386
Performance of growing-finishing, fed high-moisture or artificially dried corn in complete and free-choice diets, 1307
Reciprocal recurrent selection in,: Carcass traits, 821
The nutritional value of high moisture and reconstituted sorghum grain for, 1222
Use of carbohydrate and fat as energy source by obese and lean, 894
Swine, growing-finishing
Effect of various dietary arginine:lysine ratios on performance, carcass composition and plasma amino acid concentrations of, 362
Swine, progeny of
Growth and carcass traits at 135 kg for, selected for growth and backfat, 275
Swine (Sus scrofa)
Behavior and ecology of wild and feral, 482
Synthetic human pancreatic growth hormone-releasing factors
Growth hormone response of steers injected with, 430

T

Tansy ragwort (Senecio jacobaea) plant
Mutagenic responses of, pyrrolizidine alkaloids and metabolites in goat milk with the salmonella/mammalian-microsome mutagenicity test, 1245
Teratogens
In plants, 1029
Testicular development
And endocrine characteristics of boars selected for either high or low testis size, 675
Relationships among measures of, and endocrine function in boars, 1255
Testicular size
Seasonal changes in breeding activity, testosterone concentration and seminal characteristics in rams with long or short breeding season, 416
Testicular tissue
In vitro testosterone secretion by, from young bulls and the effects of chronic and acute exposure to estradiol-17β, 949
Testis size

Testicular development and endocrine characteristics of boars selected for either high or low, 675
Testosterone
Effects of gonadotropin response to GnRH: Cows and pony mares, 409
Seasonal changes in breeding activity, testicular size, concentration and seminal characteristics in rams with long or short breeding season, 416
Threonine
Effect of lysine and, supplementation of sorghum gestation diets on nitrogen balance and plasma constituents in first-litter gilts, 631
Tissue components
Nutritional effects on the distribution of live weight as gastrointestinal tract fill and, in growing cattle, 753
Tissue distribution
Effects of breed and castration on conformation, classification, composition and quality of lamb carcasses, 1343
Tissue protein
And energy deposition in steers fed isocaloric diets with different levels of nitrogen, 444
Toxic factors
In tall fescue, 1011
Toxicants
Nutrients and, in rapeseed meal: A review, 996
Toxicity
Monensin, in cattle, 1499
Summer fescue, in dairy steers fed tall fescue seed, 1057
Toxicity in rats
Evaluation of amino acids, B vitamins and butylated hydroxyanisole as protective agents against pyrrolizidine alkaloid, 138
Toxicology
Comparative, of monensin sodium in laboratory animals, 1512
Toxins
Hepatic metabolism and bioactivation of mycotoxins and plant, 1017
Ruminal metabolism of plant, with emphasis on indolic compounds, 1040

U

Ultrasonic methods
Accretion of fat and muscle in growing swine as assessed by, 324
Urea content
Relation of feedlot performance and certain physiological responses to the metabolizable protein and, content of cattle diets, 1285
Urea levels
Influence of pretransit zeranol implant and receiving diet protein and, on performance of yearling steers, 527

V

Vacuum tumbling
Of dry-cured hams, 1376
Vitamin C
Responses of weanling pigs to dietary supplementation with, or carbadox, 132

W

Weaned pigs
The effect of diet on fecal moisture, osmolarity of fecal extracts, products of bacterial fermentation and loss of minerals in feces of, 1403
The effect of diet on performance, digestibility, blood composition and intestinal microflora of, 1396
Weaning weight
An evaluation of bias in estimated breeding values for, in Angus beef cattle field records.
I. Estimates of within herd genetic trend, 545
II. Estimates of bias due to genetic trend, 550
III. Estimates of bias due to nonrandom mating, 556
Weanling pigs
Responses of, to dietary supplementation with vitamin C or carbadox, 132
Wheat straw
Effect of particle length and sodium hydroxide treatment of, on site and extent of digestion by lambs, 1454

X

Xenobiotics
Oxidative and conjugative metabolism of, by livers of cattle, sheep, swine and rats, 386

Y

Yearling Angus bulls
Estimates of heritabilities and of genetic and phenotypic correlations among growth and reproductive traits in, 887
Ytterbium chloride
As a marker for particulate matter in the rumen, 465

Z

Zeranol
Influence of pretransit, implant and receiving diet protein and urea levels on performance of yearling steers, 527
